### Abstract

Tomorrow, Quantum Medicine will revolutionize our world! We are living through an exceptional period of transition. We are moving from a world based on the Newtonian Science to a world based on Quantum Physics new discoveries! New quantum technologies are shaking the foundations of conventional medicine!

Our cells are similar to miniature batteries and electric generators. They carry electricity, create electromagnetic signals, and are powered by a low level of electrical voltage. The nervous system uses electrical energy, called nerve impulses, to transmit messages from one cell in the body to another cell in the body. Stress (physical, mental and emotional) causes dysfunction in the conduction of electrical messages. This dysfunction distorts internal messaging between cells, blocks the conduction of electrical messages in the nervous system, and can alter or alter electromagnetic signals in the body.

The QUEX Quantum Technologies based on Quantum Physics, Biofeedback and Bioresonance are designed to detect and reduce STRESS the main cause of disease in the world today. The QUEX Bioresonance and Biofeedback device makes it possible to query the body for its most acute and chronic imbalances and to correct these stressors with focused energetic therapies. The main premise of Bioresonance and Biofeedback therapies is that Electromagnetic frequencies (micro-currents) can be used to re-establish the electrical and biochemical functions of the body to restore the integrity of the tissue and promote healing. Frequency therapies as used in QUEX Technologies are holistic, personalized, efficient, safe, painless, and drug-free, without side-effects, in harmony with the environment and scientifically based. Offering over 500 assisted-by-computer Biofeedback therapies, it is the largest Healthcare software package in the world, combining both Eastern and Western philosophies and techniques. Quantum Medicine opens the doors to a new approach to Health and Wellness! Join us for this presentation where we will demonstrate the benefits of Quantum Technologies!
